Interim Management Report of Fund Performance

June 30, 2020

This interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial reports or annual financial statements at your request, and at no cost, by calling 1 800 336 9528; by writing to us at Stone Asset Management Limited, 40 University Ave., Suite 901, Toronto, Ontario, M5J 1T1; or by visiting our website at www.stoneco.com; or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

STONE DIVIDEND GROWTH CLASS

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

June 30, 2020

INVESTMENT OBJECTIVES

The investment objective of the Stone Dividend Growth Class (the "Fund") is to achieve above-average long-term capital growth that is consistent with a conservative investment philosophy encompassing a diversified portfolio approach. The Fund invests primarily in equity securities of Canadian companies that demonstrate financial strength and good growth potential.

INVESTMENT STRATEGIES

The Fund will invest in companies that offer potential for strong growth and have the ability to provide stable dividend payments. When evaluating the investment potential of a particular company, the Portfolio Manager (as defined below) may assess the financial condition and management of the company, analyze financial data and other information sources to compare revenue acceleration, earnings and cash flows and conduct company interviews.

Investment selections are broadly diversified among all market segments; the Portfolio Manager does not have a bias towards any particular sector. A portion of the assets of the Fund may also be invested in foreign securities. Under normal market conditions, it is anticipated that the Fund will invest approximately 30% of its assets in foreign securities in accordance with its performance benchmark, although the Fund's investments in foreign securities may be above this level from time to time.

RISK

The overall long-term risk of the Fund is as described in the most recent simplified prospectus. No material changes occurred that would significantly increase the risk associated with an investment in the Fund during the period.

RESULTS OF OPERATIONS

Market Overview and Impact on the Fund

The 2020 year-to-date has experienced some of the most volatile periods in the history of the stock market. We really must break down this period into two halves to analyse how the markets behaved thus far in 2020. The 1st quarter suffered massive losses on the fear of the potential economic impact of COVID-19 on companies and profitability.

This was then followed by the 2nd quarter which recovered dramatically on the hopes for the re-openings and resumption of economic activity as central banks and government authorities provided massive stimulus spending plans.

By the end of the 1st quarter, the markets received the full-fledged details of the potential economic and corporate toll from the COVID-19 pandemic and it was not pretty. The talk was no longer about whether we were going to enter a recession but how deep of a slowdown we would experience. With roughly four-fifths of the national population told to stay home, we witnessed a historic collapse in economic activity.

Airplanes were grounded, streets were empty, and factories shut. At least one-quarter of the US economy had suddenly gone idle amidst the coronavirus pandemic. This was an unprecedented shutdown of commerce that has never occurred on such a grand scale. Estimates for a GDP contraction of 25.0% for Q2 (after a 5.0% retrenchment in Q1 GDP) had markets on edge for the entire month of March.

The global store and business closures and lockdowns resulted in a wave of job losses. The main act came from the US employment figures which showed a staggering rise in the initial unemployment claims number of 6.65 million. Most people will agree that the data would get worse before it got better, so we were bracing for more negative economic news in subsequent months.

Forecasts were for an unemployment rate that would exceed 10.0%. This is a huge, extraordinary hit to the economy. The World markets was down 21.4% for the Q1 while the US markets down 19.6%, Dow Jones down 23.2% and the Canadian markets down 20.9%.

The second half of 2020 was the total opposite story for the stock market. Even though the economic data was not impressive, the markets looked forward to a recovering economy and boost to corporate profits and resulted in one of the best quarters in decades. Hopes for a potential opening of economies, coupled with select corporate earnings that were not as bad as originally feared, were cause for investors to plow back into the markets.

The US markets was up a staggering 19.9% for the quarter giving it its best quarterly return since 1998. This market recovery comes only three months after investors were lamenting the end of the bull markets as equities had plunged 35.0% in less than 6 weeks. The subsequent rebound has been just as brisk.

The World markets gained 18.8% for the quarter. The Dow Jones was up 17.7% in Q2 and the Nasdaq led all markets with an astounding 30.6% in the quarter. The Canadian markets also kept pace with a 15.9% gain in Q2. This is a remarkable comeback as the nation went from a full shutdown to a gradual reopening.

As is the case most often, Canada's diverse sectors led to a mix of returns.

Combining the two quarters resulted in less first half dramatic numbers with the World markets down only 6.6%, the US markets down 4.0%, the Dow Jones down 9.6% and the Canadian markets down 9.1%. The Nasdaq was one of the strongest markets YTD with a gain of 12.1%

The best performing sector on the Canadian markets YTD was the information technology sector with a 61.8% move YTD. Shopify, now the largest publicly traded company in Canada, has seen its shares skyrocket as the covid lockdowns have forced businesses to use their software to create an online presence.

The materials sector was strong with a 14.5% gain YTD led by the gold sector rally of 34.2%. The virus outbreak and resulting money printing by central banks have pushed investors into safety haven assets such as gold. The yellow metal is up 17.0% for the year. The heavyweight financials sector suffered an 18.1% drop in 2020 thus having the most negative impact on the overall market.

STONE DIVIDEND GROWTH CLASS

MANAGEMENT DISCUSSION OF FUND PERFORMANCE (continued)

The other lagging sectors include the energy sector dropping 32.4% YTD as the price of oil collapsed due to demand destruction from covid and the price war between the Saudi's and Russia. At one point in the year, oil prices collapsed to negative \$40/barrel. Real estate dropped 22.1% for 2020 and healthcare was down 22.1%.

Investors did flock into the stability of food companies and grocery stores lifting the consumer staples sector 0.6% YTD while the attractive dividend yields of the utilities sector limited the losses for this sector to 3.7%.

With over 40.0% of US companies pulling their forward guidance for earnings outlooks, the market really is walking a dangerous tightrope. Just a reminder of the multiple steps in our wall of worry – US-China tensions, poor economic data, covid, civil unrest, US elections, and lack of clarity on corporate outlooks.

The economic picture continues to be bleak with 20 million people losing their jobs in the US and retail sales suffering a deafening blow compared to levels before the pandemic levels. Even though there was an uptick in the job creation figure in the past month, the risk is that the recovery will get cut short with the number of new covid cases on the rise.

The number of companies that have filed for bankruptcy protection is staggering and across multi industries – Hertz Car Rental, JC Penney, Chesapeake Energy, Whiting Petroleum, 24-Hour Fitness, J-Crew, and Neiman Marcus just to name a few.

The markets may be close to all time highs, but the market internals are painting a different picture. While the US markets is above its 200-day moving average, we have mentioned before that it is just a handful of stocks which is driving the markets higher. In fact, only 27.0% of US companies are above their 200-day moving average reflecting a very select market.

This two-tier market would have to expand to the lagging equities (value, cyclicals) for the market to be more convincing.

All the nervousness in the economy and markets resulted in the collapse in bond yields around the world as threats to the global economy forced investors into the safety of fixed income. The yield on the benchmark US 10-year Treasury dropped an incredible 125bp YTD to 0.64% bringing it to the lowest level in many years.

Canadian 10-year bond yields also dropped 115bp to 0.51%. The doves have all come out on the global stage to foster inflation and GDP growth in their respective regions. Bonds have been feasting on the threatening slowdown in global economic activity and equity markets' volatility. Most global central banks have become more accommodative as witnessed by the US Federal Reserve dropping rates all year and the European Central Bank commenting on rates staying steady and the Bank of Australia move in lowering rates two consecutive occasions by 25bp each time.

These markets wish for low rates and their wishes have been granted.

COVID-19 impact:

To preserve our client's capital, our Stone cash levels have increased by about 5-10.0% in our SAM-managed mutual funds. Cash balances now range from 10.0% to 15.0% within the funds. Within our pure total return and income mandates, companies that are either highly leveraged or at risk of cutting their dividends have been sold.

Within our growth mandates, we eliminated companies that will have a hard time growing in this challenged environment. All the portfolios have been structured as more defensive compared to their benchmark. We believe the best way to invest in markets as these is to have a total return focus. Investors should be rewarded by buying companies with a strong growth profile and growing dividend stream.

Under an economic contraction scenario, companies which can sustain their dividends are attractive investments. All the public equity holdings are liquid positions and can be sold within a day.

We remain invested and are committed to companies that provide revenue growth, improving free cash flow and higher earnings per share. We are active portfolio managers with a disciplined investment process including the implementation of various risk management tools to benefit our investors.

Performance

The Fund had no exposure in several interest-sensitive sectors such as Telecommunications and Real Estate compared to the benchmark 5.2% weight in Telecommunications, and 3.2% weight in Real Estate. The weakness in the above sectors proved to be a contributor for the Fund as bond yields plummeted and interest-sensitive sectors failed to bounce back following the March correction.

Our Utilities exposure of 6.6% vs. the benchmark of 5.0% made up for some of our underweight exposure in other interest-sensitive sectors and was neutral in that the selection of investments provided slightly less downside returns compared to the benchmark with Boralex Inc., Class "A" and Brookfield Infrastructure Corp., Class A providing 27.0% return over the period while newly added holding Transalta fell 27.0%.

Even though our Energy weight began the period below the benchmark at 3.6% vs. 15.0%, our energy weight was reduced to only 1.3% weight after exiting Suncor during the period. This gross sector underweight was the most significant contributor to performance as the energy benchmark tumbled 30.5% during the period.

Our stock selection in the Consumer Non-Cyclicals sector was another positive despite being only slight above weight than the benchmark. A strong return from the Canadian vitamin company Jamieson Wellness Inc. allowed the Fund to outperform the benchmark sector.

The Fund's Industrials weight which was below the benchmark but despite the underweight position, stock selection resulted in the Fund outperforming the sector benchmark by 26.0%. Strong performance came from holdings in CargoJet Inc. and TFI International Inc., up 55.5% and 11.7% respectively.

The Fund's largest weight was in the Financials sector, where despite being well overweight, the holdings performed slightly better than the benchmark. We exited positions in the US banks JP Morgan and Bank of America during the period.

STONE DIVIDEND GROWTH CLASS

MANAGEMENT DISCUSSION OF FUND PERFORMANCE (continued)

Our Basic Materials sector weight increased from 1.9% to 8.7% as holdings in gold producers were added during the period, including Wheaton Precious Metals Corp. that was up 35.6%.

Our overweight position in the Technology sector also did well with companies such as Microsoft Corp., VISA Inc., Class “A” and Open Text Corp., but we underperformed the benchmark due to no weighting in two of Canada’s largest technology companies, Shopify Inc or Kinaxis, neither of which pay a dividend.

The Fund held a larger than normal cash balance of 9.9%, up from 1.8% at the end of last year which was used dampen any market drawdowns.

The Fund’s Series outperformed its benchmark during the period %. As mentioned above, both sector allocation and stock selection were the reasons for our outperformance vs. the benchmark. In addition, our US investments made up 40.6% of the portfolio, inclusive of US dollar cash, and the 4.5% fall in the Canadian dollar had a positive effect on our US holdings.

Our disciplined approach toward total return remains a core practice in managing the portfolio risk and this approach is paying off.

As a result the Fund’s Series generated the following returns for the period.

Series									
A	B	C	F	L	O*	PTF*	T8A	T8B	T8C
-3.1%	-3.4%	-3.4%	-2.5%	-3.4%	n/a	n/a	-3.1%	-3.4%	-3.3%

*Returns are not disclosed for series of the Fund that have been in existence for less than one year.

Any differences in performance returns between Series are primarily due to different management and operating fees that are applicable to a particular Series. Please refer to “Past Performance” for details regarding the performance of the Fund’s Series. The calculation of the Fund’s Series performance takes into consideration all fees and expenses of the Fund, which are not applicable in the calculation of the benchmark’s performance. The Fund’s broad-based benchmark, the Morningstar® Canada Index returned -7.4% over the same period.

The comparison to this broad-based index is provided to enable you to compare the Fund’s performance relative to that of the general market. A comparison to the Fund’s benchmark, which is composed of 80% of the Morningstar® Canada Index and 20% of the Morningstar® US Large Cap Index, provides a comparison to a benchmark that is more reflective of the Fund’s investment objective and strategy. The Fund’s benchmark returned -5.0% over the same period.

Change in Net asset value

Net Assets of the Fund decreased by 5.9% or \$18.2 million during the period, from \$308.8 million at December 31, 2019 to \$290.6 million at June 30, 2020. This change in Net Assets is attributed to net sales (redemptions) of (\$6.4) million, cash distributions of \$2.3 million and (\$9.5) million to investment operations, including market appreciation (depreciation), income and expenses.

RECENT DEVELOPMENTS

Please see “Results of Operations” for market-related developments. There are no known changes at this time to the manager, portfolio manager or the composition of the Independent Review Committee

Statement of Compliance

The financial statements have been prepared in compliance with International Financial Reporting Standards (“IFRS”), as published by the International Accounting Standards Board (“IASB”).

RELATED PARTY TRANSACTIONS

Stone Asset Management Limited (“SAM”) is the manager and portfolio manager of the Fund. SAM is a wholly owned subsidiary of Stone Investment Group Limited.

Fund Manager

As Fund Manager, SAM is responsible for managing the Fund’s overall business and day-to-day operational services, as described under the headings “Management Fees” and “Operating Fees”.

Portfolio Manager

As Portfolio Manager, SAM is responsible for providing portfolio management services to the Fund.

Under the terms of the Investment Management Agreement, the Portfolio Manager is entitled to receive a performance fee (plus applicable taxes) from each Series of securities of the Fund equal to 10 percent of the amount by which the Fund’s Series rate of return exceeds the return of the Fund’s established benchmark since the last time a Performance fee was paid, multiplied by the Fund’s average series Net Asset Value (“NAV”) during the calendar year.

Performance fees are limited to a maximum of 0.30 percent (plus applicable taxes) of the Funds’ Series average Net Asset Value during the calendar year. Such fees are accrued monthly, if applicable, and paid annually.

STONE DIVIDEND GROWTH CLASS

MANAGEMENT DISCUSSION OF FUND PERFORMANCE (continued)

Management fees

The Fund pays a management fee, calculated daily and paid monthly, based on the following schedule:

Series	A	B	C	F	L
Annual Fee (%)	2.00	2.50	2.50	0.95	2.50

Series (cont'd)	O	PTF	T8A	T8B	T8C
Annual Fee (%)	-	0.65	2.00	2.50	2.50

The following table lists the major services received by the Fund, as a percentage of the Management Fee:

Series	A	B	C	F	L
Dealer Compensation (%)	50	20	30	-	20
Investment and Fund Management (%)	50	80	70	100	80
Total (%)	100	100	100	100	100

Series (cont'd)	O	PTF	T8A	T8B	T8C
Dealer Compensation (%)	-	-	50	20	30
Investment and Fund Management (%)	-	100	50	80	70
Total (%)	-	100	100	100	100

Operating fees

The Fund pays operating fees (the “Operating Fees”) to SAM for the day-to-day operational services. The Operating Fees include, but are not limited to: legal and audit fees, transfer agency costs, custodian costs, filing fees, administrative and overhead costs charged by SAM, and the Independent Review Committee of the Fund.

Operating fees incurred by the Fund are allocated among the Series on a reasonable basis as determined by SAM.

At its sole discretion, the manager may waive management fees or absorb expenses of the Fund. The management expense ratios of each of the series of units of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table.

Independent Review Committee

SAM has established the Independent Review Committee (the “IRC”) for the Fund in accordance with the requirements of National Instrument 81-107 – Independent Review Committee for Investment Funds in order to review conflicts of interest as they relate to investment fund management.

The compensation and other reasonable expenses of the IRC are paid pro rata out of the assets of the Fund for which the independent review committee acts. The main component of compensation is an annual retainer. The Chair of the IRC is entitled to an additional fee.

† Series closed to new purchases on December 4, 2009.

‡ Series closed to new purchases on August 31, 2011.

*Series O was seeded on August 1, 2019 at \$10.00.

§Series PTF was seeded on September 3, 2019 at \$10.00.

Explanatory Notes:

- This information is derived from the Fund's unaudited interim financial report and annual audited financial statements.
- Net assets and dividends are based on the actual number of securities outstanding at the relevant time. The increase/(decrease) from operations is based on the weighted average number of securities outstanding over the financial period. It is not intended that the Fund's net asset per security table act as a continuity of opening and closing net assets per security.
- Dividends were paid in cash and/or reinvested in additional securities of the Fund.

† Series closed to new purchases on December 4, 2009

‡ Series closed to new purchases on August 31, 2011.

* Series opened on August 1, 2019.

§ Series opened on September 3, 2019.

Explanatory Notes:

- This information is provided as at each period shown.
- Management expense ratio ("MER") for each series is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average NAV during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

STONE DIVIDEND GROWTH CLASS

PAST PERFORMANCE

YEAR-BY-YEAR RETURNS

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, or other charges that would have reduced returns or performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

The following charts present the Fund's performance for each of the periods shown and illustrate how the Fund's performance varied from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except where noted. Returns are not disclosed for series of the Fund that have been in existence for less than one year.

Interim Management Report of Fund Performance

June 30, 2020

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to: market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest and the risks detailed from time to time in the Fund's simplified prospectus. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, the Fund does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
