Interim Management Report of Fund Performance

June 30, 2020

This interim Management Report of Fund Performance contains financial highlights but does not contain either the interim financial report or annual financial statements of the investment fund. You can get a copy of the interim financial reports or annual financial statements at your request, and at no cost, by calling 1 800 336 9528; by writing to us at Stone Asset Management Limited, 40 University Ave., Suite 901, Toronto, Ontario, M5J 1T1; or by visiting our website at www.stoneco.com; or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

STONE DIVIDEND YIELD HOG FUND

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

June 30, 2020

INVESTMENT OBJECTIVES

The investment objective of the Stone Dividend Yield Hog Fund (the "Fund") is to provide investors with high investment returns by investing primarily in income producing securities such as income trusts, bonds, common and preferred shares.

INVESTMENT STRATEGIES

In order to achieve the Fund's objective, in respect of the equity component of the Fund's portfolio, investments are made based on an analysis of financial information of each potential investment to identify undervalued companies with improving fundamentals and high potential for price appreciation.

Other factors, including economic data, are used to identify business cycle trends. The Fund may invest up to 49% of net assets in foreign securities, may write covered calls and puts (secured by cash) to enhance income and may use derivatives and invest in other mutual funds. In respect of the fixed income component of the Fund's portfolio, investments are made based on an analysis of the yield curve to identify securities offering good relative value.

RISK

The overall long-term risk of the Fund is as described in the most recent simplified prospectus. No material changes occurred that would significantly increase the risk associated with an investment in the Fund during the period.

RESULTS OF OPERATIONS

Market Overview and Impact on the Fund

The 2020 year-to-date has experienced some of the most volatile periods in the history of the stock market. We really must break down this period into two halves to analyse how the markets behaved thus far in 2020. The 1st quarter suffered massive losses on the fear of the potential economic impact of COVID-19 on companies and profitability.

This was then followed by the 2nd quarter which recovered dramatically on the hopes for the re-openings and resumption of economic activity as central banks and government authorities provided massive stimulus spending plans.

By the end of the 1st quarter, the markets received the full-fledged details of the potential economic and corporate toll from the COVID-19 pandemic and it was not pretty. The talk was no longer about whether we were going to enter a recession but how deep of a slowdown we would experience. With roughly four-fifths of the national population told to stay home, we witnessed a historic collapse in economic activity.

Airplanes were grounded, streets were empty, and factories shut. At least one-quarter of the US economy had suddenly gone idle amidst the coronavirus pandemic. This was an unprecedented shutdown of commerce that has never occurred on such a grand scale. Estimates for a GDP contraction of 25.0% for Q2 (after a 5.0% retrenchment in Q1 GDP) had markets on edge for the entire month of March.

The global store and business closures and lockdowns resulted in a wave of job losses. The main act came from the US employment figures which showed a staggering rise in the initial unemployment claims number of 6.65 million. Most people will agree that the data would get worse before it got better, so we were bracing for more negative economic news in subsequent months.

Forecasts were for an unemployment rate that would exceed 10.0%. This is a huge, extraordinary hit to the economy. The World markets was down 21.4% for the Q1 while the US markets down 19.6%, Dow Jones down 23.2% and the Canadian markets down 20.9%

The second half of 2020 was the total opposite story for the stock market. Even though the economic data was not impressive, the markets looked forward to a recovering economy and boost to corporate profits and resulted in one of the best quarters in decades. Hopes for a potential opening of economies, coupled with select corporate earnings that were not as bad as originally feared, were cause for investors to plow back into the markets.

The US markets was up a staggering 19.9% for the quarter giving it its best quarterly return since 1998. This market recovery comes only three months after investors were lamenting the end of the bull markets as equities had plunged 35.0% in less than 6 weeks. The subsequent rebound has been just as brisk.

The World markets gained 18.8% for the quarter. The Dow Jones was up 17.7% in Q2 and the Nasdaq led all markets with an astounding 30.6% in the quarter. The Canadian markets also kept pace with a 15.9% gain in Q2. This is a remarkable comeback as the nation went from a full shutdown to a gradual reopening.

As is the case most often, Canada's diverse sectors led to a mix of returns.

Combining the two quarters resulted in less first half dramatic numbers with the World markets down only 6.6%, the US markets down 4.0%, the Dow Jones down 9.6% and the Canadian markets down 9.1%. The Nasdaq was one of the strongest markets YTD with a gain of 12.1%

The best performing sector on the Canadian markets YTD was the information technology sector with a 61.8% move YTD. Shopify, now the largest publicly traded company in Canada, has seen its shares skyrocket as the covid lockdowns have forced businesses to use their software to create an online presence.

The materials sector was strong with a 14.5% gain YTD led by the gold sector rally of 34.2%. The virus outbreak and resulting money printing by central banks have pushed investors into safety haven assets such as gold. The yellow metal is up 17.0% for the year. The heavyweight financials sector suffered an 18.1% drop in 2020 thus having the most negative impact on the overall market.

STONE DIVIDEND YIELD HOG FUND

MANAGEMENT DISCUSSION OF FUND PERFORMANCE (continued)

The other lagging sectors include the energy sector dropping 32.4% YTD as the price of oil collapsed due to demand destruction from covid and the price war between the Saudi's and Russia. At one point in the year, oil prices collapsed to negative \$40/barrel. Real estate dropped 22.1% for 2020 and healthcare was down 22.1%.

Investors did flock into the stability of food companies and grocery stores lifting the consumer staples sector 0.6% YTD while the attractive dividend yields of the utilities sector limited the losses for this sector to 3.7%.

With over 40.0% of US companies pulling their forward guidance for earnings outlooks, the market really is walking a dangerous tightrope. Just a reminder of the multiple steps in our wall of worry – US-China tensions, poor economic data, covid, civil unrest, US elections, and lack of clarity on corporate outlooks.

The economic picture continues to be bleak with 20 million people losing their jobs in the US and retail sales suffering a deafening blow compared to levels before the pandemic levels. Even though there was an uptick in the job creation figure in the past month, the risk is that the recovery will get cut short with the number of new covid cases on the rise.

The number of companies that have filed for bankruptcy protection is staggering and across multi industries – Hertz Car Rental, JC Penney, Chesapeake Energy, Whiting Petroleum, 24-Hour Fitness, J-Crew, and Neiman Marcus just to name a few.

The markets may be close to all time highs, but the market internals are painting a different picture. While the US markets is above its 200-day moving average, we have mentioned before that it is just a handful of stocks which is driving the markets higher. In fact, only 27.0% of US companies are above their 200-day moving average reflecting a very select market.

This two-tier market would have to expand to the lagging equities (value, cyclical) for the market to be more convincing.

All the nervousness in the economy and markets resulted in the collapse in bond yields around the world as threats to the global economy forced investors into the safety of fixed income. The yield on the benchmark US 10-year Treasury dropped an incredible 125bp YTD to 0.64% bringing it to the lowest level in many years.

Canadian 10-year bond yields also dropped 115bp to 0.51%. The doves have all come out on the global stage to foster inflation and GDP growth in their respective regions. Bonds have been feasting on the threatening slowdown in global economic activity and equity markets' volatility. Most global central banks have become more accommodative as witnessed by the US Federal Reserve dropping rates all year and the European Central Bank commenting on rates staying steady and the Bank of Australia move in lowering rates two consecutive occasions by 25bp each time.

These markets wish for low rates and their wishes have been granted.

COVID-19 impact:

To preserve our client's capital, our Stone cash levels have increased by about 5-10.0% in our SAM-managed mutual funds. Cash balances now range from 10.0% to 15.0% within the funds. Within our pure total return and income mandates, companies that are either highly leveraged or at risk of cutting their dividends have been sold.

Within our growth mandates, we eliminated companies that will have a hard time growing in this challenged environment. All the portfolios have been structured as more defensive compared to their benchmark. We believe the best way to invest in markets as these is to have a total return focus. Investors should be rewarded by buying companies with a strong growth profile and growing dividend stream.

Under an economic contraction scenario, companies which can sustain their dividends are attractive investments. All the public equity holdings are liquid positions and can be sold within a day.

We remain invested and are committed to companies that provide revenue growth, improving free cash flow and higher earnings per share. We are active portfolio managers with a disciplined investment process including the implementation of various risk management tools to benefit our investors.

Performance

The Fund was underweight in several sectors which included Basic Materials, Energy, Industrials, Technology and Consumer Non-Cyclical sector. The Basic Materials weight began the period well below the benchmark weight of 11.0% but was increased during the period to close with 7.3% weight strictly in gold equities.

The subsector increased 34.9% during the period. The slight underweight position in Energy was neutral to the Fund as we exited our only international integrated energy company, Royal Dutch Shell, and missed out on some return as it bounced back marginally. The Consumer Non-Cyclical sector was positive to performance due to the addition of several preferred shares purchased in the period that performed better than the corresponding equities, including George Weston Ltd., Preferred Series "I", Perpetual and Loblaw Cos. Ltd., Preferred, Series "B", Perpetual.

Despite being slight above weight to the benchmark, the Fund's Financials performance was in line with the benchmark due to higher allocation to names like Sun Life Financial Inc., Manulife Financial Corp. and Power Corp. of Canada that outperformed the broader Financials sector.

The Fund had no exposure in Health Care which is warranted due to companies generally paying either no dividend or having low dividend yields to Fund growth, including the Canadian cannabis companies that drove the Health Care sector down 29.4% over the period. Similarly, the Fund had no exposure in Information Technology due to dividend yields not reaching our threshold level and resulted in significant underperformance versus the benchmark weight of 7.8% and return of 48%.

The Fund held overweight positions in Telecommunications Services and Utilities. The Fund's weight in Telecommunications Services of 15.0% versus the benchmark weight of 5.4% was a detractor to performance as all but one of the holdings generated negative returns over the period. The weighting in Utilities is the largest sector weighting for the Fund and the largest overweight for the Fund versus the benchmark.

STONE DIVIDEND YIELD HOG FUND

MANAGEMENT DISCUSSION OF FUND PERFORMANCE (continued)

The Utilities sector generated poor returns over the period and the Fund manager's allocation to this sector was a slight detractor to performance.

The Fund held a higher than normal cash balance of 10.6% compared to 1.8% held at the end of 2019 as the Fund Managers managed risk of high yield holdings at risk of dividend adjustments.

As a result the Fund's Series generated the following returns for the period.

	Series				
	A	F	O*	T5A*	T5F*
	-18.3%	-17.8%	n/a	n/a	n/a

*Returns are not disclosed for series of the Fund that have been existence for less than one year.

The Fund's benchmark, the Morningstar® Canada Index performed similarly to indices around the world that were down significantly during the period.

Any differences in performance returns between Series are primarily due to different management and operating fees that are applicable to a particular Series. Please refer to "Past Performance" for details regarding the performance of the Fund's Series. The calculation of the Fund's Series performance takes into consideration all fees and expenses of the Fund, which are not applicable in the calculation of the benchmark's performance.

For the period, the Fund's Series underperformed against the benchmark as the benchmark was down -7.4%.

Change in Net asset value

Net Assets of the Fund decreased by 27.2% or \$2.8 million during the period, from \$10.3 million at December 31, 2019 to \$7.5 million at June 30, 2020. This change in Net Assets is attributed to net sales (redemptions) of (\$1.0) million and (\$1.8) million to investment operations, including market appreciation (depreciation), income and expenses.

RECENT DEVELOPMENTS

Please see "Results of Operations" for market-related developments.

There are no known changes at this time to the manager, portfolio manager or the composition of the Independent Review Committee.

Statement of Compliance

The financial statements have been prepared in compliance with International Financial Reporting Standards ("IFRS"), as published by the International Accounting Standards Board ("IASB").

RELATED PARTY TRANSACTIONS

Stone Asset Management Limited ("SAM") is the manager and portfolio manager of the Fund. SAM is a wholly owned subsidiary of Stone Investment Group Limited.

Fund Manager

As Fund Manager, SAM is responsible for managing the Fund's overall business and day-to-day operational services, as described under the headings "Management Fees" and "Operating Fees".

Portfolio Manager

As Portfolio Manager, SAM is responsible for providing portfolio management services to the Fund.

Management fees

The Fund pays a management fee, calculated daily and paid monthly, based on the following schedule:

Series	A	F	O	T5A	T5F
Annual Fee (%)	2.00	0.75	-	2.00	0.75

The following table lists the major services received by the Fund, as a percentage of the Management Fee:

Series	A	F	O	T5A	T5F
Dealer Compensation (%)	50	-	-	50	-
Investment and Fund Management (%)	50	100	-	50	100
Total (%)	100	100	-	100	100

Operating fees

The Fund pays operating fees (the "Operating Fees") to SAM for the day-to-day operational services. The Operating Fees include, but are not limited to: legal and audit fees, transfer agency costs, custodian costs, filing fees, administrative and overhead costs charged by SAM, and the Independent Review Committee of the Fund.

Operating fees incurred by the Fund are allocated among the Series on a reasonable basis as determined by SAM.

At its sole discretion, the manager may waive management fees or absorb expenses of the Fund. The management expense ratios of each of the series of units of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table.

Independent Review Committee

SAM has established the Independent Review Committee (the "IRC") for the Fund in accordance with the requirements of National Instrument 81-107 – Independent Review Committee for Investment Funds in order to review conflicts of interest as they relate to investment fund management.

The compensation and other reasonable expenses of the IRC are paid pro rata out of the assets of the Fund for which the independent review committee acts. The main component of compensation is an annual retainer. The Chair of the IRC is entitled to an additional fee.

STONE DIVIDEND YIELD HOG FUND

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the periods indicated.

†Series was seeded on August 1, 2019 at \$10.00.

Explanatory Notes:

1. This information is derived from the Fund's unaudited interim financial report and annual audited financial statements.
2. Net assets and dividends are based on the actual number of securities outstanding at the relevant time. The increase/(decrease) from operations is based on the weighted average number of securities outstanding over the financial period. It is not intended that the Fund's net asset per security table act as a continuity of opening and closing net assets per security.
3. Distributions were paid in cash and/or reinvested in additional securities of the Fund.

†Series opened on August 1, 2019.

Explanatory Notes:

1. This information is provided as at each period shown.
2. Management expense ratio ("MER") for each series is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average NAV during the period.
3. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
4. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

STONE DIVIDEND YIELD HOG FUND

PAST PERFORMANCE

YEAR-BY-YEAR RETURNS

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, or other charges that would have reduced returns or performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

The following charts present the Fund's performance for each of the periods shown and illustrate how the Fund's performance varied from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except where noted. Returns are not disclosed for series of the Fund that have been in existence for less than one year.

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to: market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest and the risks detailed from time to time in the Fund's simplified prospectus. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, the Fund does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
